

Name

While you are waiting for your pumpkin seeds to dry, design and make a seed packet for seeds to sell or give to someone who you hope will grow them!

1 What information goes on a seed packet?

Look at a range of seed packets to give you some ideas. Find one that you like and record the different types of information on the front and back of the packet e.g. seed name, how to grow instructions.

2 Making a seed packet template.

Either open out a seed packet and draw around it to make a template or use the template given to you.

3 Developing your design ideas.

Use a blank template to decide where your information will go on the packet and develop your design ideas. When you're happy with your final design, transfer it onto your own template and make up your seed packet.
